

ATTENTION:

The file of our catalog you are about to view is for product reference only not current pricing.

The prices contained on the following catalog pages reflect the current pricing at the time of printing. (12/09)

When placing an order, please make sure to check with the Griffin representative as to the current prices.

Thank you,

Personal Protective Equipment (PPE)

PPE's Include: coveralls, respirators, protective eyewear, and chemical-resistant suits, gloves, footwear, aprons, and headgear.

Replacing Respirator Filters, Cartridges, or Canisters

Employers must:

1) Replace dust/mist respirator filters:

- When breathing resistance becomes excessive,
- If the filter is damaged or torn,
- Whenever the respirator manufacturer or pesticide labeling says to replace them
(if the instructions differ, change the filter at the shorter interval),
- At the end of each day's work period, if no other instructions or indications of service life are available.

2) Replace gas and vapor-removing respirator cartridges or canisters:

- At the first indication of odor, taste, or irritation,
- When the respirator manufacturer or pesticide labeling says to replace them
(if instructions differ, change the cartridge or canisters at the shorter interval),
- At the end of each day's work period, if no other instruction or indications of service life are available.

Cleaning and Maintaining PPE

Employers must do the following:

- 1) Keep pesticide-contaminated PPE away from other clothing or laundry, and wash it separately.
- 2) If PPE will be reused, clean it before each day of reuse according to the instructions from the PPE manufacturer unless the pesticide labeling specifies other requirements. If there are no such instructions or requirements, wash PPE thoroughly in detergent and hot water.
- 3) Thoroughly dry the clean PPE before it is stored, or put it in a well-ventilated place to dry.
- 4) Store clean PPE separately from personal clothing and away from pesticide-contaminated areas.

These personal protective equipment statements are taken from the EPA's booklet on Worker Protection Safety.

 **Always Wear the Proper
Personal Protection Equipment
Indicated on the Product Label**

RESPIRATORY PROTECTION

ValuAir® General Purpose Paintspray & Pesticide Respirator

- Soft, pliable facepiece for maximum comfort
- Paint, lawn & garden spray respirator for mixing and applying paints and pesticides
- Thermoplastic elastomer facepiece
- Offers low breathing resistance, soft sealing flange and forward angled nosepiece easily accommodates protective eyewear

Wear Personal Protective Equipment (PPE) to reduce Dermal Exposure to Pesticides

Dermal or skin exposure accounts for about 90% of the exposure a pesticide user receives

Rates of absorption through the skin are different for different parts of the body. Compared to dermal absorption rate through the forearm (absorption rate of 1), absorption through the groin area would be more than 11 times faster.

Absorption continues to take place on all of the affected skin area as long as the pesticide is in contact with the skin. The seriousness of the exposure is increased if the contaminated area is large or if the material remains on the skin long enough to allow for absorption.

Air Purifying Helmets For Spraying Pesticide & Herbicides

PROF 88

Professional 88 Protective Helmet with two built-in fan units and two filters for gas and dust.

K80S-T8N(G)

PROF 88

Self-contained helmet for easy mobility, Ideal for orchard, field and greenhouse use.

This powered air-purifying helmet respirator has fan blowers, batteries and filters all built into the helmet, offering you excellent freedom of movement in fields or tight working areas.

The PROF 88 can run for four hours on its batteries, or continuously from a tractor or vehicle's power using the SP88 12 volt cigarette lighter socket cord. The internal batteries can be charged from the optional NC-9 Charger, or from a tractor with the SP88 cord.

System Includes:

- helmet with flip-up visor
- SP88 12 volt cord for cigarette lighter socket
- two ZA1P3 Filters
- instructions

Optional:

- NC-9, 110 volt power supply
- NIOSH approval #TC-21C-633

For Spraying Pesticides & Herbicides

K80S-T8N (G)

This high quality, fiberglass, powered air-purifying helmet respirator provides NIOSH-approved protection against organic pesticides requiring a TC-23C type respirator. NIOSH Approval #TC-23C-1572.

Battery provides four hours of operating time on a four hour charge from the 110 volt battery charger included.

The helmet is pressurized by positive pressure with 8 CFM and is vented by one-way valves located on the collar.

The K80s-T8N (G) helmet features a flip-up, Lexan visor with a tough fiberglass shell. An adjustable head-band for sizes up to 7. Can be worn with beards and eyeglasses.

The blower/fan unit and battery are worn on a belt around the waist.

System Includes:

- 110 volt battery charger
- blower/fan unit
- two ZA2/P3 filters
- instructions
- helmet
- air hose
- belt

Kasco has the right system to protect you against pesticides, dust or any other hazardous chemicals that you might encounter. Kasco helmets can also be utilized to increase worker contentment in atmospheres that are particularly odorous or irritating.

All helmets are triple inspected at the factory and sealed and are covered by a 12 month limited warranty.
